

Opportunities for a Graduate Transport Planners / Modellers, London

Fore is a leading independent advisor delivering expert advice and bespoke services to clients throughout the UK in transport, urban development and places. We are an energetic and ambitious company and due to our increasing workload, we are seeking to recruit an exceptional individual to join our team in London to help us deliver an interesting variety of projects for our growing client base.

This is an exciting opportunity to join an experienced and growing team and work on a range of projects for a wide variety of clients. At Fore we encourage personal growth and professional development. We offer a varied workload including advice to developers, transport modelling, transport scheme appraisal, working with public transport operators and developing transport strategies and funding solutions for local authorities.

We are looking to appoint a dynamic and self-motivated individual with strong analytical and communication skills, who takes a logical approach to problem solving. The role will involve developing and using spreadsheets, specialist transport planning and modelling software, report writing and communication with our team and clients.

No specific transport-related experience is required as full training will be provided. However, the ideal candidates are likely to have a BSc/MSc in an analytical subject such as mathematics, science, economics, geography, or engineering. We are looking to recruit for full time roles but would also consider applications initially as a placement with a minimum period of three months.

The role will be based in our London office located in Hackney, with the opportunity for flexible hybrid working.

How to Apply

Please submit your CV and a covering letter explaining the skills and experience you could bring to our team to london.applications@foreconsulting.co.uk.

Fore is not accepting recruitment agency CVs for this position.
